BEFORE FIRST USE

Step 1
put cooking oil in the pan and heat it. Add potato peelings and a lot salt, then let it fry a bit.

Step 2
Take a kitchen towel and carefully rub the mixture around the inside of the pan.

Step 3
After rubbing the pan thoroughly, empty the pan. Now there will be residue of the potato peelings left in the pan.

Step 4
To remove the residue put a lot of salt in the pan and rub the salt around the pan with a kitchen towel to remove the residue. Don't do this on the stove.

Step 5
Remove the dirty salt, wipe the pan clean and pour a thin layer of oil in the pan.

Step 6
Spread the oil in the pan with a clean kitchen towel. The pan is now ready for first use or storage.
